Open PC-Based Machine Tool Controllers for CNC and Factory Automation for Power, Price & Ease of Use

ATTN: Office of Petitions

December 29, 2003

Office of Petitions, Fax: 703-746-7239

Application/Control Number: 10/079,309

Art Unit: 2125

RECEIVED

JAN 8 8 2004

Technology Center 2100

We received a "Notice of Abandonment" in error. After speaking with Mr. Albert Paladini on the telephone, his instructions were to write the Office of Petitions to strike the "Notice of Abandonment" and reactivate our patent submittal.

On 10 June 2003, the PTO sent us an "Office Action Summary" stating that we had three months to respond. A copy of this "Office Action Summary" is attached. On 12 August 2003 we responded to the 10 June 2003 "Office Action Summary" well within the three-month time frame. Attached is the "Auto-Reply Facsimile Transmission" coversheet generated by the PTO on 12 August 2003 at 6:36 p.m. indicating the PTO's receipt of our response to the 10 June 2003 "Office Action Summary." Inadvertently there was a clerical error stating that a reply was not received by the PTO within the three-month time frame.

On 27 August 2003, the PTO sent us another "Office Action Summary" stating that we had three months to respond. A copy of this "Office Action Summary" is attached. We believe that this "Office Action Summary" was in direct response to our 12 August 2003 patent resubmittal. On 12 November 2003, we resubmitted our patent again addressing the items listed in the 27 August 2003 "Office Action Summary." Attached is the "Auto-Reply Facsimile Transmission" coversheet generated by the PTO on 12 November 2003 at 07:06 p.m. indicating the PTO's receipt of our response to the 27 August 2003 "Office Action Summary."

As shown by the attached items, there has been a mistake. In all cases, we have responded to each "Office Action Summary" within the three-month time frame. It appears that your office lost the mailing correspondence sent to Mr. Albert Paladini on 12 August 2003 thus resulting in your statement that our 12 November 2003 submittal was past the expiration period of three months.

We also never received a "Notice of Final Rejection." We believe you may have confused our other Patent Application (Application/Control Number 10/036,174) with this Patent Application.

The PTO received our latest patent submittal on 12 November 2003. Please provide us with further instructions if we need to resubmit this patent submittal again.

Sincerely,

Gary J. Corey

Dear Mr. Albert Paladini Patent Examine Fax: 703-746-7239

Application/Control Number: 10/079,309

Thank you for taking the time to assist us in properly preparing and submitting our latest claims. Per your instructions, we have amended our claims to demonstrate how the elements operate together to perform a function and we have included essential elements and structural cooperative relationships of these elements. The format of our amended claims is in accordance with 37 CFR 1.121(c) of the Manual of Patent Examining Procedure and the "Flyer for mailing with all Office actions by all TCs" which accompanied your latest communication to us mailed on 06/10/2003. Original Claims 1-8 have been canceled, restated or re-presented and Claims 9-11 have been added as either new claims or re-presented claims.

in addition, we have added three new drawings (FIG 7., FIG 8., and FIG 9.) to our Patent application. A description of these new drawings has been added to the "BRIEF DESCRIPTIONS OF THE SEVERAL VIEWS OF THE DRAWINGS" section in our patent application along with the actual drawings

We have resubmitted our patent application per your recommendations in today's

Sincerely,

Gary J. Corev

Art Unit 2125

Thank you for taking the time once again to essist us in properly preparing and submitting our latest claims. Per your instructions, we have amended our claims to better demonstrate how the elements operate together to perform a function and we have included essential elements and structural cooperative relationships of these elements. The format of our amended claims is in accordance with 37 CFR 1.121.

In addition, we are submitting both a clean version and a marked up version of our patent application in accordance with 37 CFR 1.125 due to the extensive nature of the amendments made. The clean and marked up versions have been mailed to your office today.

Sincerely,

mo Ch Gary J. Corey

Application/Control Number: 10/079,309

Art Unit: 2125

1. The substitute specification filed on 5/8/03 has not been entered because it does not conform to 37 CFR 1.125(b)because: the statement as to lack of new matter under 37 CFR 1.125(b) is missing.

The amendment to the claims filed on 5/8/03 does not comply with the requirements of 37 CFR 1.121(c) because 4 new claims were added and no claims cancelled, and the amendment did not conform to 37 CFR 1.121(c) of the Manual of Patent Examining Procedure. Amendments to the claims filed after March 1, 2001 must comply with 37 CFR 1.121(c) which states:

(c) Claims.

- (1) Amendment by rewriting, directions to cancel or add: Amendments to a claim must be made by rewriting such claim with all changes (e.g., additions, deletions, modifications) included. The rewriting of a claim (with the same number) will be construed as directing the cancellation of the previous version of that claim. A claim may also be canceled by an instruction.
- (i) A rewritten or newly added claim must be in clean form, that is, without markings to indicate the changes that have been made. A parenthetical expression should follow the claim number indicating the status of the claim as amended or newly added (e.g., "amended," "twice amended," or "new"). (ii) If a claim is amended by rewriting such claim with the same number, the amendment must be accompanied by another version of the rewritten claim, on one or more pages separate from the amendment, marked up to show all the changes relative to the previous version of that claim. A parenthetical expression should follow the claim number indicating the status of the claim, e.g., "amended," "twice amended," etc. The parenthetical expression "amended," "twice amended," etc. should be the same for both the clean version of the claim under paragraph (c)(1)(i) of this section and the marked up version under this paragraph. The changes may be shown by brackets (for deleted matter) or underlining (for added matter), or by any equivalent marking system. A marked up version does not have to be supplied for an added claim or a canceled claim as it is sufficient to state that a particular claim has been added, or canceled.
- (2) A claim canceled by amendment (deleted in its entirety) may be reinstated only by a subsequent amendment presenting the claim as a new claim with a new claim number.
- 2. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/079,309 Page 3

Art Unit: 2125

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

3. For the Applicant's information and benefit for future filings, the examiner performed an unofficial review of the new claims, which were not entered. The claims are incomplete in that they do not comprise either a set of elements, which operate together to perform a function, or they do not provide a set of process steps enabling a function to be performed. The preamble to claim 1 recites a number of capabilities of the "technology element," but the body of the claim does not support any of these capabilities. The body of the claim merely states that the user provides an input for preferences, and somehow the tool meets all the objectives. It would be analogous to stating that a user prepares a wish list, or a written list of requirements, and submits it to a machine, and then the machine performs all of the necessary functions to meet the user's requirements. The claims must demonstrate how the elements operate together to perform the function. The claims are incomplete for omitting essential elements or

Application/Control Number: 10/079,309 Page 4

Art Unit: 2125

structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

4. Any inquiry concerning this communication or earlier communication from the examiner should be direct to Albert W. Paladini whose telephone number is (703) 308-2005. The examiner can normally be reached from 7:30 to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Leo P. Picard, can be reached on (703) 308-0538. The official fax phone number for the organization where this application or proceeding is assigned is (703) 746-7239, and after final faxes should be directed to (703) 746-7238.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
